## MFG Chemical Hires Joe Dymecki as Director of Sales

by OILMAN Editor October 12, 2020

### SHARE0

Chattanooga, TN – MFG Chemical, a leader in specialty chemical contract manufacturing, announces the hiring of Joe Dymecki to the position of Director of Sales.

In this critical position, Joe will bring added value by understanding customer needs and utilizing MFG Chemical's pilot plant and four manufacturing plants to deliver high-quality contract chemical production with safety, timeliness, confidentiality, quality and sustainability.

Joe is a proven chemical industry leader, with 28 years of successful experience. Before joining MFG Chemical, Joe served as VP Sales for Dubois Chemicals, prior to which he led Selig Industries and Zep Inc. as VP Sales and VP Business Effectiveness, respectively.

Earlier in his career Joe was honored to receive his companies' Chairman Award and Founders Award for outstanding achievements.

After graduating from the University of West Florida, Joe served proudly for four years as a United States Marine.

MFG Chemical President & CEO Paul Turgeon stated, "I couldn't be more pleased than to have someone of such exceptional experience, skill and character as Joe Dymecki on the MFG Chemical team. This is a pivotal position for which he is ideally suited. Joe's invaluable chemical industry experience, high energy and character will make him an excellent partner for MFG Chemical customers and a great teammate for his MFG colleagues."

Joe Dymecki, MFG Chemical Sales Director added, "I'm excited and proud to be part of this MFG Chemical team. I look forward to working with so many longstanding friends in the industry, as well as new customers who will also benefit from MFG's exceptional capabilities, including four ISO 9001: 2015 Certified custom chemical plants and the very popular pilot plant."

### **About MFG Chemical**

MFG Chemical, LLC is a leading specialty and custom chemical manufacturer for a variety of global markets. The Company is headquartered in Dalton, GA, and operates four manufacturing facilities with world-class product development capabilities in Northwest Georgia and Pasadena, Texas.

Key chemistries include Dioctyl Sodium Sulfosuccinates (DOSS), Amides, Esters, Imidazolines, Rheology Modifiers, Surfactants, Specialty Anhydrides and Water Soluble Polymers.
